Applicable Standards

This report documents conformance to the **Web Content Accessibility Guidelines (WCAG) 2.2, Levels A and AA**, published by the World Wide Web Consortium (W3C), also adopted as international standard ISO/IEC 40500:2025. Because WCAG 2.2 is backwards-compatible, conformance to it also satisfies WCAG 2.1 Level AA — the technical standard the U.S. Department of Justice adopted under Title II of the Americans with Disabilities Act for state and local government web content in its April 2024 final rule.

[If this report is prepared for a specific public entity, note its applicable compliance deadline here based on population served under the DOJ's Title II rule — entities serving 50,000 or more residents by April 26, 2027; smaller entities by April 26, 2028.]

Terminology

Supports — the functionality of the product/site has at least one method that meets the criterion without known defects.

Partially Supports — some functionality does not meet the criterion.

Does Not Support — the majority of functionality does not meet the criterion.

Not Applicable — the criterion is not relevant to this product/site (e.g., no time-based media present).

Not Evaluated — the product/site has not been evaluated against this criterion.

Evaluation Methods Used

- ☐ Automated scanning tool ☐ Manual keyboard-only navigation
- ☐ Manual color-contrast analysis ☐ Screen reader spot-check
- ☐ Manual code / markup review ☐ Other:
